

STELLAR Console Table - Onyx Black

JAKE PHIPPS

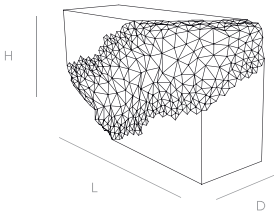

WWW.JAKEPHIPPS.COM

Part of the award winning Stellar Collection - the Stellar Console Table is inspired by the precious qualities of naturally forming amethyst geodes and machine cut diamonds. The large expansive surfaces on the table are in stark contrast to the turbulent seam of individually sized and angled mirrored sections that run through them.

This change in surface creates an optical dispersion that breaks down the light and the surrounding environment, delivering each piece to the eye as one sparkling entity. As the ambience of the environment changes throughout the day, so too does the colour and lustre of the table, creating an ever changing focal point to a room.

Also available in an original mirror polished steel finish.

Winner of the Claxton Stevens Award 2013
